

S.O.S. Senior Oral-health Services

S.O.S. brings skilled oral care specialists to address the oral health of dependent adults; While we primarily see elders residing in assisted living, memory care and skilled nursing facilities, we are happy to provide home visits dependent on location.

SERVICES PROVIDED

- S.O.S. brings oral care specialists to nursing facilities once weekly to help maintain oral health of residents.
- Cleanings include: Thorough brushing and between the teeth cleaning with over-the-counter interdental aids.
- Fluoride and antimicrobial rinse are used each week to reduce bacterial growth and oral diseases.

QUALITY CARE FOR RESIDENTS

- Preserve smile
- Maintain ability to eat
- Fresh breath
- Prevention of cavities and gum disease
- Less mouth pain
- Improve quality of life
- Reduce risk for systemic diseases
- Additional person caring for and visiting resident weekly

QUALITY CARE FOR FAMILIES

- Compassionate weekly care to your loved one.
- Advocate for the dental health of your loved one.

QUALITY CARE FOR FACILITIES

- Oral health is being maintained by trained oral health professionals.
- Residents eat better, mouth odor is reduced, and residents have a better quality of life.
 - SOS supports the efforts of the care team.
 - Providing our services sets your facility apart from others.
 - No extra cost to the facilities, all services are privately contracted.

Why S.O.S. is Important

Poor oral care can affect the overall quality of life of your loved one. As plaque builds up, the risk of gum disease, dental pain, and tooth loss increases, making it difficult to eat properly. Research also reports other risks including developing aspiration pneumonia, poor control of glycemic levels if diabetic, and an increased risk of cardiovascular disease.
